WEEKLY OUTBREAK SUMMARY, 2014: EPID WEEK 01

Food Poisoning

The first food poisoning episode this year for Johor was reported from Kluang. A total of 66 out of 200 workers (an attack rate of 33.0%) from the Goucera Tile Factory developed stomach ache (32.0%), diarrhoea (29.5%), headache (4.5%), nausea (3.0%), vomiting (2.0%) and lethargy (1.0%) after having their last meals at 6.30 pm at the factory on 1/1/2014. The first onset appeared at 3.00 pm on 2/1/2014. Prolonged holding time of the food before serving contributed to this outbreak. Nonetheless, only 17 victims required treatment as outpatients at the Poliklinik Intan, a private clinic. Clinical specimens, proxy food samples and environmental swabs had been collected and sent to the Makmal Kesihatan Awam Johor Bahru for laboratory analysis. Meanwhile, the factory canteen that prepared the implicated meals was temporarily closed under the PCID Act 1988 (Act 342) pending further health inspection.

Note: Please verify with the Epidemiology (CDC) Unit, Public Health Division, Johor State Health Department before quoting above figures and outbreak summary.
