WEEKLY OUTBREAK SUMMARY, 2014: EPID WEEK 25

Food Poisoning

On 18/6/2014 at 5.00 pm, Muar Health Office re-directed to Ledang Health Office on food poisoning notification it received from Klinik Kesihatan Maharani, Muar involving five students from Sekolah Menengah Sains (SMS) Muar, Ledang. Further field investigation conducted by Ledang health team found another 16 students at the same boarding school, which has a total of 636 students, with food poisoning signs and symptoms which were abdominal ache (100.0%), vomiting (85.7%), diarrhoea (76.2%), headache (52.4%), nausea (33.3%) and fever (33.3%). The implicated food was fried rice prepared by school canteen operator, not by food handlers at hostel kitchen. The white rice for the menu was cooked at 12.00 midnight before it was cooked at fried rice only at 6.00 am then served at 7.30 am on 16/6/2014. The first food poisoning symptom appeared four and a half hour later after consumption. Only above five victims required outpatient treatment, none were referred to hospital. Proxy food samples, clinical specimens and environmental swabs were collected and sent to Makmal Kesihatan Awam Johor Bahru for laboratory analysis. The school canteen had been temporarily closed under Food Act 1983.

Conjunctivitis

On 17/6/2014 at 9.00 am, Kluang Health Office received conjunctivitis notification from Klinik Kesihatan Mengkibol affecting students from Sekolah Menengah Agama (SMA) Kerajaan Johor, Kluang. Active searches found a total of 72 students, all males (out of 304 male and 296 female students), with conjunctivitis at the school. An index case had an onset on 8/6/2014 and he came back early to the hostel after the school break. The school management failed to alert the health authority early on the outbreak. All the cases were given symptomatic treatment with their conjunctival swabs had been collected for both bacteriological and virological investigations. All of them were isolated away from other asymptomatic students.
