WEEKLY OUTBREAK SUMMARY, 2014: EPID WEEK 06

Hand, Foot, Mouth Disease (HFMD)

On 4/2/2014, Muar Health Office received HFMD notifications – two each from Klinik Kesihatan (KK) Air Hitam and KK Bakri, respectively. Field investigations conducted for KK Air Hitam found a total of seven HFMD cases among kids at the Taska Permata Kemas Sri Cempaka, Batu 18, Air Hitam and a total of three HFMD cases for KK Bakri which linked to the Tabika Perpaduan Taman Khalidi Baru, Jalan Junid, Muar. All the cases were given symptomatic treatment without hospital admission. Their clinical specimens had been collected and sent to the Makmal Kesihatan Awam Kebangsaan (MKAK) Sg. Buloh, Selangor for viral isolation. Meanwhile, both kindergartens were issued closure order for two weeks.

Conjunctivitis

The Muar Health Office received a conjunctivitis cluster notification on 5/2/2014 from a staff nurse at the Pusat Latihan Khidmat Negara (PLKN) Nasuha, Pagoh. A total of seven (six females and a male) out of 378 PLKN trainees (an attack rate = 1.9%) presented with features of viral conjunctivitis. An index case developed the first symptom on 25/1/2014 (before the Chinese New Year leaves) whereby failure to isolate this first case had led to spread to other cases of the same dormitory or class room. Three of the cases were referred to the Ophthalmology Clinic at the Hospital Pakar Sultanah Fatimah (HPSF), Muar for further assessment. Conjunctival swabs had been collected and sent to the MKAK Sg. Buloh, Selangor using viral transport media (VTM) for isolation. Together, all the cases were put under isolation away from other trainees at the camp.

Note: Please verify with the Epidemiology (CDC) Unit, Public Health Division, Johor State Health Department before quoting above figures and outbreak summary.
